4. **Recruiter App** (Skill - **Kotlin, Android, MVVM, Retrofit, Dagger-2, Azure Functions**)

The application is designed for Job Seeker where user can search the Job and apply for the same. It also has the Refer & Earn feature where job seeker can refer the JD to the friends and earn the money on stage basis. This app also can be used as Recruiter those can just refer the JD and earn money.

5. **Intercambio Money Transfer**, A Fintech Company (Skill - **Android, MVP, Retrofit**)

The application provides a platform where user can transfer money from one country to another. User has to pay fee based on selected agent and amount. It has super-send feature where user can choose more exchange rate. User can choose Pickup Type as Office Pickup & Bank Deposit and Payment Type as Debit Card & Pay at Store. As of now this application is restricted to use for only US users.
